**SASKTEL SUCCESSFULLY DEPLOYS UREACH TECHNOLOGIES'  
CONVERGED SERVICES FRAMEWORK FOR MOBILE, FIXED-LINE AND  
BROADBAND SUBSCRIBERS**

*New solution will deliver both legacy voice messaging and next generation services to SaskTel customers*

**HOLMDEL, NJ – March 15, 2006** – uReach Technologies ([www.ureachtech.com](http://www.ureachtech.com)), a leading provider of converged communication solutions for fixed-line, mobile, and broadband service providers, today announced it's Converged Service Framework has been successfully deployed with SaskTel, the leading full service communications company in Saskatchewan . This deployment marks the end of a legacy messaging transition for SaskTel that began in early 2005.

The uReach Technologies solution will power wireline, wireless and VoIP voice messaging services for SaskTel customers. It will also enable SaskTel to leverage a single, network agnostic framework, to develop new next generation services and bring them to market quickly and economically.

“When we set out to replace our legacy voice messaging infrastructure, we sought a vendor that could deliver an evolutionary solution that would adapt to our needs over time,” said Robert Watson, President and CEO of SaskTel, “uReach Technologies was the only vendor that could deliver the application functionality SaskTel required while meeting the technical challenge of aligning with SaskTel's Network Evolution Vision from a single, converged, infrastructure.”

Leveraging a standard-based software architecture running on open systems, uReach's Converged Services Framework (CSF) was designed from the ground up to meet service providers' stringent requirements for reliability and availability, while remaining cost-effective to deploy and operate.

uReach further differentiates itself by offering both a turn-key managed service and fully-licensed solution for service providers.

“SaskTel’s successful deployment is incredibly gratifying,” said Krishnamurthy Kambhampati, CEO and co-founder of uReach Technologies. “Working together, SaskTel and uReach have consistently demonstrated leadership and an ability to innovate in the marketplace. We’re very proud that SaskTel has relied on our technical expertise and application strength to help make messaging convergence a reality for their customers.”

uReach Technologies will be demonstrating its Converged Services Framework at the Spring VON 2006 Conference & Expo in booth 1825 and 425.

### **About uReach Technologies**

uReach Technologies, Inc is the leading provider of converged communication solutions for the service provider market. The uReach Converged Services Framework (CSF) offers a standard-based and IMS-compliant approach for uniformly deploying value-added voice and data services across wireless, wireline and IP properties quickly, economically and in scale. Running exclusively on open systems, uReach Enhanced Voice Messaging, Audio-SMS, Multimedia Messaging, Single Number Service are currently deployed with over 40 service providers in 38 countries improving the way millions of subscribers communicate everyday.

uReach is a privately held company headquartered in Holmdel NJ with offices in Wilmington, MA. For more information, visit [www.uReachCorp.com](http://www.uReachCorp.com).
